

HERMANN AUST

Mechanical engineer (Dipl.-Ing.) specializing in software automation and infrastructure. Experienced in developing Python tooling and automated evaluation processes, complemented by hands-on knowledge of containerization, CI/CD, cloud platforms, and operating self-hosted Linux infrastructure.

EDUCATION

Diplom-Ingenieur, Mechanical Engineering

Grade: 2.1

Specialization: Automotive Engineering

Technische Universität Dresden (10/2019 - 05/2025)

Thesis Topic:

Development of a data logger based on the HUAdapter Gen 2 for evaluating automated driving functions

General Higher Education Entrance Qualification (Abitur)

Romain-Rolland-Gymnasium Dresden (08/2010 - 05/2018)

PROFESSIONAL EXPERIENCE

Vehicle Integration Engineer (02/2026 - present)

Bertrandt Ingenieurbüro GmbH

- Performed software and hardware upgrades on test vehicles and E/E systems
- Analyzed, diagnosed, and resolved faults across vehicle networks
- Commissioned and validated vehicle functions
- Documented fault patterns and system states

Diploma Thesis Student (11/2024 - 05/2025)

FSD Fahrzeugsystemdaten GmbH

- Developed a data logger for evaluating automated driving functions
- Processed and analyzed GNSS and IMU data
- Implemented evaluation algorithms in Python
- Migrated the Python evaluation pipeline to AWS cloud (prototype) to investigate scalability with growing test data volumes

Working Student (10/2021 - 11/2024)

FSD Fahrzeugsystemdaten GmbH

- Automated evaluation of CAN bus data using Python
- Developed tools for analyzing vehicle measurement data
- Implemented ROS nodes for sensor integration in test vehicles

Research Internship (09/2023 - 04/2024)

Technische Universität Dresden

Topic: Conversion of a test bench for parallel aging of catalytic converters

Technical Internship (09/2022 - 03/2023)

FSD Fahrzeugsystemdaten GmbH

Topic: Analysis of standardized EOBD data for vehicle performance evaluation

SKILLS

- **Containerization & Docker**
- **CI/CD & Automation:**
 - GitHub Actions
 - Continuous Deployment (Cloudflare Pages)
 - Git
- **Linux & Bash**
- **Cloud:**
 - Cloudflare (Pages, Tunnel, DNS)
 - AWS (cloud-based data processing, Lambda, SQS, CloudWatch, S3)
- **Programming:**
 - Python (pandas, ROS, uv, threading, PyQt)
- **Testing:**
 - Selenium

LANGUAGES

- **German:** Native speaker
- **English:** Fluent (business proficient)

Projects

Portfolio Website:

Static website with continuous deployment via Git & Cloudflare Pages, including a CI/CD pipeline built with GitHub Actions
Self-hosted Home Server (Raspberry Pi)
Linux server with containerized stack via Docker & Portainer, with automated stack rebuild after system failure
